Professional Summary

Computer Science undergraduate specializing in Machine Learning, Data Science, and Full-Stack Development, with hands-on experience building AI-driven applications deployed on cloud platforms. Participated in international hackathons including **NASA Space Apps** and **IBM** AI challenges, with strong interest in AI research and graduate study.

Education

The University of Agriculture, Faisalabad *September 2022 –May2026*

Bachelor of Science in Computer Science (3.34 / 4.00)

Core Coursework: Data Structures & Algorithms (DSA), Object Oriented Programming (OOP), Operating Systems, Database Systems, Computer Networks, Software Engineering, AI, Machine Learning, Web Technologies, Digital Signal Processing

Technical Skills

- **Programming Languages** – Python, JavaScript
- **Web Development** – ReactJS, Vite, Tailwind CSS, HTML5, CSS3, JWT Authentication, REST APIs
- **Backend Development** – Fast API, Django
- **Cloud & Deployment** – Vercel, Railway, Azure, Streamlit Cloud
- **Version Control** – Git, GitHub
- **Databases** – MongoDB, PostgreSQL, MS SQL, SQL
- **Data Science** – Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Tableau, Streamlit, EDA
- **Machine Learning** – Regression, Classification, Clustering, Tree-based models, Neural Networks
- **Graphic Designing** – Social media post design, Icon design, Logo design.
- **Tools & others** – Jupyter Notebook, Anaconda, Adobe Photoshop, Illustrator, Matlab

Work Experience

Data Science Intern (*Remote*) *1/September - 30/September 2025*

DataZenix

- **Building Projects:** Improved prediction accuracy by 25% over baseline, achieving 92% accuracy.
- **Project Titles:** Iris Flower Classification, Unemployment Analysis, Car Price Prediction, Email Spam Detection, Sales Prediction.

Admission Help Desk *July – October (2023 &2024)*

ITRCDB, University of Agriculture

- **Admission Support:** Maintained detailed records of inquiries and resolutions to improve the efficiency of help desk operations & resolving complaints of new applicants.
- **Documents:** Created custom layouts, documents, and visual designs for internal communications and documentation.

Professional Projects

Full Stack Developer – *Sundar*

- **Client-Based Project:** Delivered a complete website solution for a real customer organization, from requirements to deployment.
- **Designed and built:** Created an online presence for Sundar Marbles using React Vite, Tailwind CSS, React

router.

- **Backend Excellence:** Used Django and real-time database (PostgreSQL), and Blob cloud storage.
- **Deployment:** Deployed the web app on Vercel and MS Azure

Personal Projects

1. **NASA Exoplanet Detection Web App** *(ExoLume - NASA Space App Challenge)*

- **International Team Collaboration:** Worked in a 3-member team including an international participant; presented the project vision and technical approach through online collaboration sessions.
- **Global & Local Evaluation:** Delivered a complete remote project presentation to **U.S.-based local NASA Space Apps judges**, explaining objectives, methodology, and results.
- **Integrated Development:** Created an Exoplanet detection app using Data Science and Machine Learning with streamlit User Interface using NASA dataset.
- **Expected outcome:** Enabled accurate identification of exoplanets from astronomical data using trained ML models.

2. **Data Analysis on HR data** *(Semester Project)*

- Applied Logistic regression, Decision Tree and Random Forest on HR data
- Analyze the results of the data using confusion matrix and its sub metrics for evaluation of the results as precision, accuracy, recall & F1.
- Use Streamlit for visualizing results in a web-based interface.

3. **IBM Hackathon – Urban Planning with AI** *(IBM Watson Hackathon)*

- **Developed and deployed:** Developed an AI-based city planning solution to detect urban hotspots within a 10 km² area and generate budget-aware improvement suggestions using Google Maps and temperature analysis.
- **Deployment:** Streamlit Cloud

4. **Neural Style Transfer App** *(Personal project)*

- **Integrated Development:** Applied the visual style of one image to another using neural style transfer.
- **Deployment:** Streamlit Cloud

5. **Space Learning App** *(Astroplay - Code with KIRO Hackathon)*

- **Integrated Development:** Built an interactive app with 3D planet renders delivering a playful space-learning environment featuring quizzes, mini-games, animated 3D modules, and data-science visualizations of astronomical data.
- **Deployment:** Vercel

Hackathons and Competitions

- **IAAC Final round Silver Honour:** Secured 16/20 points and ranked 8% among all participants.
- **Massachusetts Institute of Technology (MIT²):** Got position 108 out of 533 teams worldwide with 550/900 points.
- **NASA Space App challenge 2025:** Make an app on Challenge *Detection of Exoplanets using Data Science,* worked with my ML lead teammate and I as a Data Scientist worked on Nasa Exoplanets Datasets.
- **IBM Urban AI Hackathon 2025:** Created AI urban Planning Box App.
- **Code with KIRO Hackathon 2025:** Built a dynamic space learning app.

Certifications & Courses

Getting Started with Python
Coursera - University of Michigan *February 06, 2025*

Advance Data Analyst
Coursera - Google *February 06, 2025*
